## Ubuntu 16.04 Install Latest FreeTDS

[command.sh](#)

```
1 $ sudo apt-get install wget
2 $ sudo apt-get install build-essential
3 $ sudo apt-get install libc6-dev
4
5 $ wget ftp://ftp.freetds.org/pub/freetds/stable/freetds-1.00.27.tar.gz
6 $ tar -xzf freetds-1.00.27.tar.gz
7 $ cd freetds-1.00.27
8 $ ./configure --prefix=/usr/local --with-tdsver=7.3
9 $ make
10 $ make install
```

If "ftp.freetds.org" is down

Then in that case download from below http link and follow rest of instructions to install FreeTds.

[FreeTds download link](#)

FYI... on Windows Subsystem for Linux with Ubuntu, you have to install autoconf first

sudo apt-get install autoconf

then follow the instruction above for installing FreeTDS, except instead of `make install` you need to c

sudo make install

Does anyone know how to make this the "default" version of FreeTDS? When I run `tsql -c`, it's still s

**Shanil-shah** commented on 19 Jun 2018

You need to remove it using `sudo apt-get autoremove freetds-dev freetds-bin`
